TOWN & COUNTRY LUXURY FIREPLACES

# ARCHITECTURAL SERIES

IGNITE YOUR DESIGN

## Discover the Architectural Series from Town & Country: luxury fireplaces that enhance your style

The Architectural Series invites you to ignite moments to remember: lit by a perfect flame, enhanced with LED lighting, dancing on a bed of tumbled diamond glass, with as much - or as little - intensity as you want.

Corner Right - 4' Flame, 16" Tall Glass - Black Enamelled Panels

Single Sided - 5' Flame, 16" Tall Glass - Black Enamelled Panels

## Embrace the flame

Town & Country Luxury Fireplaces let you incorporate the unbroken flame into your design. Smart features include safe-touch glass, available in three heights, and a touchscreen panel to control flame, light, and colour. Quality craftsmanship that enhances your style.

## Flexibility without a premium

The Architectural Series fireplaces are designed to fit your imagination.

Zero-clearance installations\*, load-bearing designs\*, and a custom firebox airflow system so you can complete the look with artwork or a big screen TV, right above the fireplace.

With seven layouts, three glass heights, and flames that run 3' to 8', you can add a luxury fireplace into virtually any design.

\*Refer to technical details on page 12

Single Sided - 6' Flame, 16" Tall Glass - Titanium Enamelled Panels

Single Sided - 7' Flame, 16" Tall Glass - Seamless Black Glass

## Choose the look that fits your vision

Configure your fireplace with a backdrop of porcelain panels, enamelled in our factory in North America. Available in two colours: Lustrous Black or Matte Titanium.

For a seamless look, choose the one-piece, continuous reflective back glass that draws focus to the fire. Both are standard options, and with a bed of tumbled, translucent glass, provide a luxurious look with or without the flame.

PANELLED TITANIUM PORCELAIN    PANELLED BLACK PORCELAIN    SEAMLESS BLACK GLASS

## Light bright

Choose any colour on the spectrum with the under-burner LED panel. Our innovative design provides consistent light in whatever hue suits your mood, with dimmable controls so you can choose the colour's intensity for your preferred ambience.

## Beyond smart

The Architectural Series fireplaces seamlessly integrate with your home automation system. Flame control and variable lighting - including light intensity, hold colour, or looping - are selected by the optional touchscreen control and can be locked out for a commercial environment.

As an additional feature, the touch screen can also provide system status, offering diagnostics for service personnel.

## ARCHITECTURAL SERIES

# Features you can work with

- Honeywell 24-volt valve actuator for reliable and safe control of the ignition system, whether you're using direct ignition or automated control to start your fire
- Unique, proprietary firebox airflow control system
- 16,000 BTUs per foot of burner
- Burner lengths between 3' and 8', in 1' increments (overall width 4' to 9')
- Continuous flame over illuminated translucent tumbled glass
- Combustible finish to glass edge
- Safe-touch glass in 3 heights (16", 24", or 32")
- Downloadable CAD files available online
- Two-year comprehensive coverage
- Limited lifetime warranty
- Exclusively available through select retail partners

For more information, including installation instructions, CAD files, venting configurations, and more, visit [townandcountryfireplaces.com](http://townandcountryfireplaces.com)

## Smart

Exclusive digital control automatically regulates venting for optimal performance and safety.

## Flexible

Innovative power vent system provides flexible options to locate - or hide - terminations in architecturally sensitive areas

## Safe

Continuous temperature monitoring adjusts fan speed to maintain safe glass temperatures

## Construction Ready

Offers structural support up to 2000lbs with no visible supports\*

\*All models excluding peninsula

## Designed for professionals

Architects, designers, and builders love our venting systems that accommodate every application. Powered direct venting, flexible terminals, and a flush termination system allow venting through exterior walls or the roof, in houses or condos, and powered venting systems allow for 150' of run and up to six 90° elbows. Venting options include horizontal flush mount, horizontal surface mount and vertical surface mount.

### SMART SENSE POWER VENTING

Flush-mountable, paintable power vents preserve the beauty of the home's exterior.
